

## “Introduction to Botox and **DERMAL FILLERS** for the Modern Dental Practice”

Featuring Drs. Warren & Janet Roberts

When: Friday, March 16, & Saturday, March 17, 2012

Where: The Columbus Institute for Cosmetic Dentistry, Columbus, Ohio

### Course Outline:

Drs. Warren & Janet Roberts have developed this hands-on training course for dentists, physicians & RN's that is the result of many years of treating patients with injectables for facial esthetics in their general and esthetic practice in Vancouver, Canada. They have taught thousands of dentists how to incorporate botox, lasers and dermal fillers in their practices to create ideal esthetics to complement their esthetic dental treatment.

You will gain the scientific knowledge, diagnostics, skills and confidence necessary with hands-on instruction and live-patient treatment to implement these new techniques into your practice. This training will build upon and complement your basic botox training and current esthetic dental procedures. You will learn how to incorporate these new procedures into your treatment plan and effectively market to your patients to increase revenue. Current statutes regulating these treatments and information on obtaining insurance coverage will also be discussed.

### Course Objectives:

- Learn the anatomy, physiology and armamentarium of injectable treatment for facial esthetics
- Review patient history, record taking and learn an effective photography system for patient consultation and assessment to motivate your patients to accept treatment
- Understand the facial aging process and how age influences the treatment plan
- Learn the proper injection techniques utilizing botox and dermal fillers to achieve a conservative esthetic result in smoothing lines and wrinkles in the perioral tissues (Nasio-labial folds, rhytids or 'smokers wrinkles', marionette lines, mentalis area, lip volumizing, restoring the vermilion border and filtrums, lifting of the commissures).
- Learn injectable esthetic treatment modalities for treating denture cases, high lip lines, uneven smile lines and conservative lip augmentation to create the ideal smile.
- Learn optimum dental blocks and infiltration techniques for pain-free soft tissue injections.

# Pacific Training Institute for Facial Aesthetics

## Comprehensive 2 Day Dermal Fillers

### **Day 1** 8:30 am –2:00pm

- Introduction to Dermal Fillers- aging 3D changes
- History of Fillers
- Classification of Fillers
- Ideal Filler 2012
- Molecular Action of HA
- Histology-degradation & longevity
- Diagnosis – smile makeover
- HA the new frontier
- Techniques
- Depth of placement
- Lips, Nasiolabial fold, Marionette lines, Cheekbone lift etc.

### 2:00pm –5:00pm

- Record taking—using the RFR Photography template to assist your patients in their treatment selection.
- Anesthesia
- Post injection
- Complications - hyaluronidase
- Practice hands-on injection techniques on template patterns

### **Day 2** 8:30am—12:00am

- Review of the aging process---Understanding the 3D aspect
- The facial treatment plan- ideal sequence of muscle relaxing with Botox, tissue repair & rejuvenation with lasers and fine tuning the 3D volume with Fillers
- “What not to do” and “What not to jump into”
- Complications – hyaluronidase
- Review the treatment plan for all the models

### 1:00pm—5:00pm

- Hands-on injections with patients
- **Each practitioner will be responsible for bringing one to two models. The ideal model age is 30-45 years, has had pre & post botox records and now wishes to remove the facial folds.**
