

The Columbus Institute of Cosmetic Dentistry

in conjunction with

American Friends of Dental Volunteers for Israel (DVI)

Presents a seminar and dental tour in Israel

The Oral-Systemic Practice, a New Paradigm 5 CE CREDITS (Lecture)

Traditional practices have been "islands" unto themselves in the healthcare sea. This course presents an alternative model that shows how integrating preventative medical philosophies can help patients and make oral-care personnel an integrative component in a patient's healthcare team.

EDUCATIONAL OBJECTIVES:

- * Participants will be able to identify "sick care" versus a true "health-care" model.
- * Participants will be able to identify preventative strategies employed and information systems used in this new model.
- * Participants will learn specific strategies to use to help patients reduce inflammation and promote immune system health.
- * Participants will learn communication systems necessary to converse with Physicians and other healthcare professionals

Presented by: Michael Goldberg DMD

Dr. Michael Goldberg, FAGD, FIADFE, FACD, FNYAD is a magna cum laude graduate of Tufts University School of Dental Medicine. A general dentist, he served on the oral surgery faculty of Columbia University School of Dental Medicine for 30 years. He was director of the New York Presbyterian Hospital's General Practice Residency Program. He is a consultant, author and maintains a private practice in New York City. Dr. Goldberg is passionate about social responsibility. He is currently president of American Friends of DVI. Since 1984 he has volunteered at the DVI clinic where he treats indigent children from all backgrounds, religions and ethnicities along with volunteer dentists from over 34 Countries.

Principles of Advanced Minimally Invasive Aesthetic Dentistry 7 CE CREDITS (Lecture)

Today, patients are looking for procedures that are less invasive, less expensive, with stunning results and that last a long time. In today's economy, dentistry is a patient driven field. It is crucial for dentists to become familiar with the newest dental materials in order to satisfy patients' needs and desires.

EDUCATIONAL OBJECTIVES:

- * Understand the material science of minimally-invasive dentistry
- * Understand how to market minimally-invasive aesthetic dentistry
- * Understand the concept of smile design, digital dentistry and computer imaging
- * Understand color and contour considerations with minimally-invasive restorations

Presented by Moshe Mizrachi CDT

Moshe Mizrachi graduated as a mechanical engineer in Israel but later began his career in dental technology in 1976 in Columbus, Ohio, receiving a CDT in 1982. He opened Mizrachi Dental Lab in 1980 and in 1998 opened the doors to the Columbus Institute of Cosmetic Dentistry, which has been a leading center in providing CE courses, attracting dentists from all over the country and the world.

The Columbus Institute of Cosmetic Dentistry is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. The Columbus Institute of Cosmetic Dentistry designates this activity for 12 CE hours of continuing education credits.
